SERVING METRO PHOENIX & SURROUNDING AREAS

THE 7 DEADLY SINS OF SEPTIC

+35 years of Arizona expertise. Avoid these. Your system depends on it.

01 DON'T DO LAUNDRY BACK TO BACK

Space it out — one load in the morning, one in the evening. Your tank needs recovery time.

02 DON'T SKIP YOUR PUMP-OUT

Too many people = too much waste. Pump every 1 to 3 years, sooner for a big household.

03 DON'T WASH PAINT OR CHEMICALS DOWN THE DRAIN

Hazardous waste kills your bacteria. It can take years of pumping to undo the damage.

04 DON'T POUR GREASE DOWN THE SINK

Grease floats and builds a scum layer that never goes away. Scoop it, jar it, trash it.

05 DON'T FLUSH WIPES, TAMPONS, OR CONDOMS

"Flushable" wipes are NOT safe for septic. They don't break down and will destroy your leach field.

06 DON'T USE DRANO OR CHLORINE TABLETS

Chemicals kill the living bacteria your system depends on. Slow drain? Call us — don't pour chemicals.

07 DON'T IGNORE A RUNNING TOILET

A leaking flapper runs 24/7 and overwhelms your tank. If you jiggle the handle — fix the flapper now.
